## Artistic Visions Dance Company

The company began with a group of college friends living the dream: an opportunity to dance and choreograph after graduating from college. For the second year now, *Artistic Visions Dance Company* is happy to provide a collaborative piece of work to the Cranford Dramatic Club's audience to enjoy dance in new and inspirational ways. As a company, it is important that our dancers learn from one another and share these experiences to grow as an individual and performer. Our goal is to take basic and abstract ideas to express them in different ways using the concept of motion. Each dancer's main focus incorporates knowing their body, easing their mind, and becoming one with the music and movement. Opening the eyes of our viewers to different forms of art is what we aspire to. We are happy to have found a home at CDC where we can expose the community to the dance world and all it has to offer.

### Solo Danza

*Sola Danza* dance company personifies the vision and expression of artistic directors Amanda Papa and Kristen Pennello who met while working on their dance degrees at Montclair State University. As educators and choreographers, their dream has finally become a reality through the talented dancers they are so blessed to work with. *Solo Danza* also strongly values individual contribution. The choreography is first composed, and then further investigated by the company as a whole. *Solo Danza's* mission is to demonstrate reflection and invention in all productions that translate the human experience into dance. Our ambition is to provide insight into the ever-evolving form that is modern dance. To be a representative for the art of dance, *Solo Danza* is comprised of dance educators whose common goal is to inform and inspire the aspiring dancers and art enthusiasts of tomorrow. *Solo Danza* furthers the appreciation and comprehension of dance as a dynamic and expressive art form that both engages and builds community.
